

**NEW**

**TURBOFARMER COMPACTS TF33.7 - TF30.9**

XG

Merlo's factories in San Defendente di Cervasca (Cuneo) cover an area of 300,000 m<sup>2</sup> (with 220,000 m<sup>2</sup> inside facilities)

1. Merlo SpA main offices
2. Final assembly lines
3. Lines for assembling components and cabs
4. Moulding of technopolymers
5. Automated storing and shipping centre
6. Machines plus attachments shipping centre
7. Final quality control
8. Technological centre
9. Steel and structural assembly lines centre
10. 3M attachments
11. CFRM (Training & Research Centre)

# The Merlo Group

## N° 1 for technology and safety

The Merlo brand has always been synonymous with advanced technology in the telehandler field and our history, since 1964, is hallmarked by experience based on determination and passion. The development of complex products, from the idea to the result, from design to sales, means being able to propose orientations for the most competitive markets.

The outcome of our efforts are compact, easy to handle telehandlers ensuring incomparable operating performance, comfort, efficiency and safety.

**At Agritechnica 2013, three important awards were received that clearly demonstrate the technological and innovative superiority of our products:**

- Turbofarmer 42.7 Hybrid: Gold Medal for innovation at Agritechnica.
- Turbofarmer II: Machine of the year 2014 in the "handling and logistics" category.
- Multifarmer: Selected as a "milestone" in agriculture.

- **> 1.100** employees
- Surface area of **300,000 m<sup>2</sup>** of which **220,000 m<sup>2</sup>** are indoors
- **90%** exports
- **600** dealers all over the world
- **8%** of turnover invested in R & D
- **54** robots

Automated boom bending workstation

Roto robotised welding of the chassis

A green Merlo telehandler is positioned in a large barn filled with stacks of hay bales. The machine's boom is extended upwards, reaching towards the top of the hay stacks. The Merlo logo is visible on the boom, and the model number TF30.9 120 is on the side of the chassis. The barn has a concrete floor and wooden walls with some windows.

Merlo, the inventor  
of the telehandler  
and its application  
in agriculture,  
presents the new  
Turbofarmer II range

# New Merlo Compact range

## Maximum performance, minimum bulk

We were the first to launch a range of telehandlers dedicated to agriculture in 1996.

Today, we proudly present the new Compact modular generation developed on the strength of experience acquired in 50 years of operations. The only telehandlers in the world that are 2 metres high and 2 metres wide.

- 40 km/h → Standard on the entire range!
- Approval → Operating machine or agricultural tractor, available for standard versions as well as for the Low Profile version with 2020 mm height
- EPD → Massime performance with reduced consumption (-18% diesel)
- Engines → 75 Hp and 122 HP
- Approval → FOPS-ROPS \*also for the Low Profile version
- Comfort → The largest cab in the category, standard on the entire range (even on the Low Profile versions)
- Fan Drive → Standard on the entire range. Radiators always clean!
- Hydraulic → Gear pump, with electro-hydraulic joystick  
Load Sensing pump with electronic joystick

- **New cab:** the **largest** in the **category**
- **Lowered cab** version without giving up anything. The same comfort!
- **40 km/h as standard** on the entire range, unique in its category
- **EPD as standard -18%** consumption
- **Fan Drive** for consistently efficient radiators

\* EN ISO 3449/2008, protection level II (highest protection level provided by the norm and equivalent to the fall of a 227 kg object from 5.22 metres)

# New Merlo Compact family

## Flagship technology and performance

### Comfort

- Largest cab on the market 1010 mm
- Standard cab on silent-block
- Cab version lowered to 2020 mm
- Reverse shuttle on Joystick, duplicated on steering column

### Hydraulic system options

- Gear pump and hydraulic command joystick
- Load-sensing pump with electronic joystick and automatic accelerator

### Efficiency – Powertrain

- Tier 4 Interim engines with 75 HP and 122 HP and Merlo 2-speed hydrostatic transmission
- EPD - Eco Power Drive as standard, optional EPD Top

### Innovative Merlo systems

- Tac-Lock rapid coupling of the attachments

### Lifting capacity

- Booms from 7 to 9 metres
- Capacities ranging from 3 to 3.3 tons

### Safety

- Cab compliant with FOPS/ROPS

### Towing versatility

- Tow hook
- Hydraulic connections (2 opt.)
- Trailer braking (Pneu/Hydr.)

### Versatility in the field

- Approved for use as an agricultural tractor on the entire range
- Low Profile versions
- 40 km/h approved for use as an agricultural tractor

# The new Compact range

## A version for every requirement

MODEL	ENGINE		CAB		HYDRAULIC		CHASSIS	TRANSMISSION	SPEED	Approval for Agricultural use	EPD		
	75 HP - Tier 4 Interim	122 HP - Tier 4 Interim	Steady	Low	Gears 95 l/min	Load Sensing 125 l/min	Fixed	2 speeds	Velocità km/h		EPD	EPD PLUS	EPD Top
TF 33.7 -75 G	X		X	OPT	X		X	X	40	X	X	OPT	
TF 33.7 - 120 G		X		OPT	X		X	X	40	X	X	OPT	
TF 33.7 -120		X	X	OPT		X	X	X	40	X			X
TF 30.9 -75 G	X			OPT	X		X	X	40	X	X	OPT	
TF 30.9 -120 G		X	X	OPT	X		X	X	40	X	X	OPT	
TF 30.9 -120		X	X	OPT		X	X	X	40	X			X

(G) gear pump

### Broad product offering:

- Available in **2 models** and **6 different** versions

### Comfort:

- The **largest** cab on the market
- Version with **low cab 2020 mm** from the **ground**, available with agricultural machine **approval**

### Technological Innovations:

- **EPD** as standard **-18%** consumption
- **Reverse shuttle** on joystick duplicated on the steering wheel
- **Automatic accelerator** (Top)
- **Fan drive** as standard

### Versatility and productivity:

- **2 engines** available with **75 HP** or **122 HP**
- **2** boom lengths **7** and **9 m**
- **2** capacities of **3** and **3.3 tons**

A close-up, low-angle shot of a green combine harvester's front section. The machine is moving through a field, and a large volume of harvested straw is being blown away from the front by a powerful fan. The straw is captured in mid-air, creating a dynamic, chaotic pattern of golden-brown stalks. The harvester's green body and a black mesh screen are visible in the foreground. The background shows a vast, flat field under a clear sky.

Fan Drive as standard on the entire range.  
Radiators always clean

## 40 km/h, -18% consumption, fan drive as standard Higher performance and lower consumption

The TF Compact range comes with two different engines: 55kW/75HP with 2.9 litres and 90kW/122HP with 3.6 litres, both Tier 4 Interim. The two-speed hydrostatic transmission adds **40 km/h, unique in its category**. All the versions are also equipped with EPD (Eco Power Drive) for electronic management of the thermal engine, helping to reduce consumption by 18%.

The EPD Plus version offers "Speed Control" mode, which memorises the machine's movement speed and keeps it constant (ideal for yard handling operations), and the ECO function, which limits the rpm for further economic savings. In combination with the electronic joystick, the EPD Top system offers automatic Diesel speed control in relation to joystick movements on order to increase telescopic boom movement speed, optimise machine performance and minimise consumption. The «Fan Drive» system has been adopted as standard, making it possible to change the direction of the fan's rotation from sucking to blowing, in order to keep the radiant pack at maximum efficiency.

Engine and radiant pack

### FAN DRIVE AND DEDICATED RADIATORS

For temperatures less than 40° the fan comes on in an inverted condition for 30" to later return to normal use

- A. Intercooler radiator
- B. Engine radiator liquid
- C. Radiator hydraulic oil
- D. Radiator hydrostatic oil

### Reduction in consumption EPD technology

- **40 km/h.** Unique in the category
- **EPD** as standard **-18%** consumption
- **Fan Drive** as standard to ensure the radiators are always clean
- Tier 4 Interim engines  
**55 kW/75 HP**  
or **90 kW/122 HP**
- **TOP version** with  
**electronic joystick**  
and **Load Sensing pump**

5

## Largest cab in its class

1. New Joystick with reverse shuttle (duplicated on steering wheel): ergonomic and user-friendly.
2. New display makes it possible to display a great deal of useful information for the operator.
3. New air conditioning system in line with automotive standards, for fast and effective heating/cooling.
4. Inching-Control: the dedicated pedal provides calibrated movements of the machine.
5. Curved windscreen: maximum visibility and safety in work at height.
6. Differential lock.
7. Drawer.

# New cab with record comfort

## One cab for two heights

The new evolved ergonomic cab with **unparalleled comfort with its 1010mm in width** is standard on the Compact range.

The lowered version ("Low Profile"), 2020 mm from the ground, is available as an option. No space will be too low!

**Cab height**  
with standard cab  
and with lowered cab (Low Profile)

All the models are FOPS and ROPS approved, even in the "Low Profile" version.  
New air-conditioning system. Warm-up and Cool-down times halved.

The new Merlo cab can now reach an internal temperature of 22°C with an external temperature of 43 °C and full sunlight and an internal temperature of 26°C with an external condition of -15 °C and no solar irradiation.

### AIR-CONDITIONING SYSTEM

The air flow is distributed evenly inside the compartment and reaches all areas.

- The same cab for two versions:  
standard **2120** mm from the ground  
low profile **2020** mm from the ground
- **Maximum** space and comfort
- **1010 mm** wide. The **largest cab** in its **category**
- Automotive type **air conditioning** system

New Compacts, excellent  
ground clearance

350 mm

tyres

# New generation of Merlo planetary axles

## Durability and reliability

Our Compact telehandlers are equipped with a **new generation of planetary axles**, conceived, designed and built entirely.

The solution with planetary reducers was chosen to keep the machine's height as high as possible.

The result of experience acquired on the field, **the axles consist of a central cast iron body, planetary reducers and differential locking**. Braking is ensured by **4 dry disc brakes keyed onto the axle shafts**, allowing a remarkable reduction in friction and, consequently, consumption.

To complete the specifications offered, **the Medium Duty telehandlers are equipped with a parking disc brake which is automatically engaged when the diesel engine is switched off**, or engaged directly by the operator in the event of work on sloping surfaces.

The new axles ensure an excellent **ground clearance of  $\pm 350$  mm (405/70-20 tyres)**, making it possible to pass obstacles with agility.

Manual parking brake selector. automatically engaged when the engine is switched off.

### THREE STEERING MODES:

FRONT WHEEL STEERING

COORDINATED STEERING

CRAB STEERING

- Axles **conceived, designed and produced** in-house by Merlo
- **Compact solution** to maintain a **reduced height** in all the versions
- **350 mm** ground clearance
- **Three steering modes**
- **Dry brakes** to **reduce friction and consumption** and ensure **40 km/h** on the **entire range**
- **Automatic engaging** of the parking brake when the **engine is switched off**

# Merlo precision and technology

## An effective and cutting-edge boom

Merlo produces the booms mounted on its telehandlers in-house and has developed unique technologies to make them strong yet lightweight, protect handling mechanisms against accidental blows and allow users to position the load in the most precise manner possible.

- ✓ Boom sheet metal welded on the boom's neutral bending axis
- ✓ Cartridge protected handling system inside the boom, thanks to a patented solution that is easy to access if maintenance is needed
- ✓ Tac-Lock: hydraulic attachment clamping system from the cab

Tac-Lock: hydraulic attachment clamping system from the cab

Pipes, power cables and auxiliary hydraulic are all located inside the boom

- **Lighter** but **stronger** booms: robotised welding on the neutral axis, area with less strain.
- **Extension mechanism**, protected inside the boom
- Carriage equipped with **Tac-Lock hydraulic locking**
- Available both with **gear pump** and **Load Sensing pump**

# From the idea to development of multi-applicability

## More efficiency and productivity thanks to Merlo

Merlo adopts simple and effective guidelines in the evolution of the product.

From conception to development, everything is studied, designed and created in the Group's plants. This simple "rule" also applies to attachments.

Backed by years of experience, Merlo's technicians have developed a wide range of attachments, divided by type and load capacity.

This standard makes it possible to adapt tested and interchangeable production equipment to allow for targeted uses, with the intention of facilitating work and reducing its execution times.

## TRAINING CENTRE

The Merlo Training and Research Centre (CFRM) has made safety training and instruction in the use of the machine its mission. The CFRM provides training courses for operators of person-carrying overhead platform, forklift trucks, telehandlers, cranes, earth-moving machinery, agricultural and forestry tractors, snow ploughs and urban cleaning vehicles.

## Countries where Merlo is a market leader

## MOVIMATICA MERLO INFOMOBILITY

Is the new system, conceived and built within the Merlo Group, for managing vehicles: it enables GPS radio-localisation in real time, monitoring operation and use, receive and manage malfunction or burglar alarms and also send commands for handling events via the internet.

# THE MERLO WORLD

## In a globalised world, **the customer always comes first!**

From excellent products to excellent service. In 2008, Merlo has adapted its production process to meet the needs of the ISO 9001 quality control system. The process is perfected and improved continuously.

At the same time, the foundations have been laid to put the Customer first, implementing investments aimed at Services such as Financing, Training Assistance, Spare parts and Telematic Means such as remote diagnostics, thanks to the Merlo Mobility project.

Automatic spare parts warehouse	2011	2014
Storage volume	1000 m <sup>3</sup>	10.000 m <sup>3</sup>
Filling	100%	85%

TF 30.9 WITH FORKS

## New Compact modular models

### The advantages that make the difference

- ✓ 6 models with low cab. A complete offer for poultry farming and more!
- ✓ All models have the "Low Profile" version available
- ✓ Pressurised cab as standard\*
- ✓ Fan reverse shuttle as standard, for radiators that are always clean to ensure maximum efficiency

### From now on, you don't have to give up anything

- ✓ 40 km/h approval for agricultural tractor use, also on "Low Profile" versions
- ✓ The same comfort ("standard" and "low Profile" versions)
- ✓ Even greater accessibility to the "Low Profile" cab

\* Cab not approved for pesticides

## 50 YEARS OF CONSTANT COMMITMENT TO WORKING TOGETHER WITH YOU

- 1964** - Establishment of the Merlo Group
- 1966** - DM and DBM: the first dumper and the first self-loading concrete mixer
- 1981** - SM: the world's first telescopic handler
- 1987** - Panoramic: the world's first telehandler with side engine
- 1991** - Roto: the world's first telehandler with rotating turret
- 1996** - Turbofarmer: the first telehandler in Europe type-approved as an agricultural tractor
- 1998** - P26: the ultra-compact telehandlers
- 2000** - Multifarmer: the first agricultural tractor with telescopic boom
- 2001** - MM: the first forestry attachment-carrier
- 2010** - Hybrid: the first diesel/electric hybrid telehandler
- 2012** - Modular: a new concept of telescopic handler
- 2013** - Three important awards at the Agritechnica in Hanover:
  - Hybrid 42.7: gold medal for technological innovation
  - Turbofarmer II range: machine of the year 2014
  - Multifarmer 40.9: a milestone in agricultural machinery
